CONFERENCE DESCRIPTION

Our **19th Annual Spring Conference on High Risk Obstetrics** has been designed for physicians, certified nurse midwives, nurse practitioners, physician assistants, nurses, and other healthcare professionals who face challenges in the care of the high risk pregnant patient.

The goal of this conference is to present current clinical data on key issues in the care of the high risk obstetric patient. Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps are identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

Our outstanding faculty has been selected based on individual areas of expertise, ability to communicate first-hand knowledge to others, and commitment to address issues of current concern to attendees.

Three morning didactic sessions and an afternoon of interactive roundtable discussions leave ample time for relaxing, enjoying family and friends, and exploring Maui. We have also arranged a variety of group tours during non-conference hours for your enjoyment.

This conference will provide you with an opportunity to network with colleagues from across the country.
