## Conference Description

Our **16<sup>th</sup> Annual Spring Conference on Pediatric Emergencies** focuses on the many challenges facing Pediatric and Emergency physicians, nurse practitioners, physician assistants and nurses involved in the clinical care of children. The goal of this conference is to increase participants' knowledge of recent advances in pediatric emergency medicine and to enhance their competence in managing common pediatric emergencies. Participants will be able to update and apply their knowledge and skills immediately to clinical practice through participation in lectures, case presentations and discussions about illnesses and injuries specific to the pediatric population.

Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps were identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

An outstanding faculty has been assembled for this conference. Faculty members are committed to providing participants with current and practical information. Each member was selected based on individual areas of expertise and ability to communicate first-hand information to participants.

Three morning sessions and one afternoon session leave ample time for exploring Aruba. We have also arranged group tours that allow for enjoyment of the area, as well as continued discussion with colleagues.

## Conference Objectives
