CONFERENCE DESCRIPTION

Our **8th Annual Summer Conference on Emergency Medicine** is designed to provide emergency and primary care physicians, nurses, nurse practitioners, physician assistants, as well as out-of-hospital providers, with state-of-the-art information on a wide variety of topics pertinent to the practice of emergency medicine. The primary goal of this conference is to enhance knowledge and competency of attendees. Emphasis will be placed on practical application of the evidence-based topics presented. In addition to didactic lectures, ample time has been allotted for participant feedback and interaction.

Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps were identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

An outstanding faculty has been assembled for this conference. Faculty members are committed to providing participants with current and practical information. Each member was selected based on their individual area of expertise and their ability to communicate first-hand information to participants.

Morning sessions and one afternoon session leave ample time for relaxing, enjoying family and friends, and exploring Jackson Hole, as well as Grand Teton and Yellowstone National Parks.
