CONFERENCE DESCRIPTION

Our **30th Annual Fall Conference on Obstetrics** has been designed for physicians, certified nurse midwives, nurse practitioners, physician assistants, nurses and other health care professionals who face ever increasing challenges in the clinical diagnoses, treatment options, and new technologies involved in Obstetrics. The goal of this conference is to provide a comprehensive update and review on current issues and contemporary topics in Obstetrics. Emphasis will be placed on practical application of evidence-based topics and implementation of a variety of risk management strategies in an effort to improve patient outcomes. In addition to didactic lectures, ample time has been allotted for participant feedback and interaction.

Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps were identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

Conference format will include didactic lectures, small group discussion sessions, and question and answer periods.

An outstanding faculty has been assembled for this conference. Faculty members are committed to providing participants with current and practical information. Each member was selected based on their individual area of expertise and their ability to communicate first-hand information to participants.

Morning sessions and one afternoon session leave ample time for exploring Paradise Island. You are sure to enjoy your participation in this conference while sharing ideas and experiences with colleagues from across the country at the exciting Atlantis Resort.

CONFERENCE OBJECTIVES

After participating in this conference, you should have an increased knowledge of, and be more competent to...

- Recognize the risks to both the mother and fetus associated with maternal obesity
- Describe the benefits of simulation-based training in obstetrics
- Recognize and treat postpartum depression
- Identify the effects of sleep deprivation on cognitive performance and the implication of such effects for a safe Obstetric practice
- Recognize an OB triage catastrophe and be able to manage the event effectively to reduce the likelihood of an adverse maternal or fetal outcome
