CONFERENCE DESCRIPTION

Our **28th Annual Fall Conference on Pediatric Emergencies** focuses on the many challenges facing Pediatric and Emergency physicians, nurse practitioners, physician assistants and nurses involved in the clinical care of children. The goal of this conference is to increase participants' knowledge of recent advances in pediatric emergency medicine and to enhance their competence in managing common pediatric emergencies. Participants will be able to update and apply their knowledge and skills immediately to clinical practice through participation in lectures, case presentations and discussions about illnesses and injuries specific to the pediatric population.

Topics for this year's conference have been selected based on extensive target audience needs assessment data resulting from professional practice gaps. These gaps were identified by a variety of sources including feedback and evaluations from past participants, clinical expert input, Symposia Medicus' online survey, and other medical and nursing data.

Conference format will include didactic lectures, smaller group discussion sessions, and question and answer periods.

An outstanding faculty has been assembled for this conference. Faculty members are committed to providing participants with current and practical information. Each member was selected based on their individual area of expertise and their ability to communicate first-hand information to participants.

You are sure to enjoy our **28th Annual Fall Conference on Pediatric Emergencies** while sharing ideas and experiences with colleagues from across the country in the beautiful setting of Maui.
