CONFERENCE DESCRIPTION

Our 24th Annual Winter Conference on Clinical Issues in OB/GYN has been designed for physicians, certified nurse midwives, nurse practitioners, PAs, nurses, and other healthcare professionals who face ever-increasing challenges in the clinical diagnoses, treatment options, and new technologies involved in caring for the female patient. The goal of this conference is to increase knowledge and enhance the competence of attendees. Emphasis will be placed on practical application of the evidence-based topics presented.

Topics for this year's conference have been selected based on the educational needs determined from the identified professional practice gaps. The gaps were derived from a variety of sources including evaluations and outcomes data from past participants; clinical expert input; Symposia Medicus' online survey; and other medical and nursing data.

Conference format will include didactic lectures, smaller group breakout and interactive sessions, case studies, and question and answer sessions.

Smaller group sessions will be held Friday afternoon. These breakout sessions are organized to provide **greater participant/faculty interaction**, and will give you an opportunity to participate in discussions on subjects relating to your particular area of interest. **Please indicate your breakout session topic choices on the conference registration form in this brochure.** Space is limited so please reserve early.

An outstanding faculty has been assembled for this conference. Each member was selected based on their individual area of expertise and ability to communicate current, evidence-based, and practical information to participants.

You are sure to enjoy our 24th Annual Winter Conference on Clinical Issues in OB/GYN while sharing ideas and experiences with colleagues from across the country in the beautiful setting of Cancun.

CONFERENCE OBJECTIVES

As a result of participating in this conference, you should have increased knowledge and enhanced competence to...

- List the leading causes of pregnancy-related death in the United States
- Discuss how to manage pulmonary edema when diuresis fails
- Recognize and describe the role of testosterone in women's sexual desire
- Describe the efficacy and safety of Uterine Fibroid Embolization
- List emerging imaging biomarkers for preventing poor obstetric outcomes

ATTENDEE REQUIREMENTS

At the conclusion of attending this conference, participants are entitled to a certificate of credit which will be available online.
